

Teaching Science Classically: 10 Essential Principles with John D. Mays

Lesson 11: Kingdom

Outline:

Kingdom

- The typical superficial treatments are inadequate and harmful.
- We can be fearlessly scientific in our approach.
 - Science is routinely showing us things that affirm the idea that there is a God.
- We can be confident that there is no conflict between the Bible and science when they are rightly interpreted.
- We need to be responsible learners.
- Science provides us with a wonderful forum for loving our neighbor. We should not do so uncritically.
- We need to bring a solid philosophy about how Christianity and science interact.
 - They don't interact (unacceptable).
 - The rise of science is gradually leading to the elimination of primitive religious belief (not adopted by Christians).
 - Science cannot make authoritative claims (unacceptable).
 - Critical realism, we cannot know exhaustively, but we can know things truly.
